

Class 10 Science – Quick Revision Notes

Chemical Reactions and Equations

- Balanced chemical equations and types of reactions
- Corrosion and rancidity definitions and prevention
- Oxidation and reduction with examples

Acids, Bases and Salts

- pH scale and indicators
- Properties of acids and bases
- Common salts and their uses

Metals and Non-metals

- Physical and chemical properties
- Reactivity series and extraction of metals
- Ionic bonding basics

Carbon and Its Compounds

- Covalent bonding, catenation, tetravalency
- Hydrocarbons: alkanes, alkenes, alkynes
- Ethanol and ethanoic acid properties
